

## A/120/CR Calibration Reference IEPE Accelerometer

10mV/g or 100mV/g  $\pm 10\%$     24gm    Std temp 125°C

General purpose Konic Shear IEPE accelerometer for use as a reference device in calibration or validation checks. Requiring a constant current supply. With a standard 10/32 tapped thread in the top of the accelerometer this allows back to back calibration of other accelerometers ensuring both devices operate along the same axis.

Available with a range of stud adaptors to allow the connection of numerous types of accelerometer to the integral 10-32 UNF tapped hole.

The A/120CR can be supplied in a range of different sensitivities to suit your requirement.

Please let our sales team know the stud size and sensitivity you require when ordering.
